IFTA Fuel Tax Report

The OBD Real-time GPS vehicle tracker is an easy to install, versatile diagnostic and monitoring device. It can monitor where your vehicle is and at what speed the vehicle is being driven.

Additionally, with the XT-2469, you can also get DTC (Diagnostic Trouble Code) reports from your password protected account if an on-board issue exists.

XT-2469 Functions

REAL TIME TRACKING & TRAVEL LOG REPORTS

This comprehensive report system is easy to read and includes details such as engine status, coordinates, street address, battery level, speed, mileage, and direction, etc.

VARIOUS CUSTOM ALERT SETTINGS

Our customizable alert system, you can fine tune your asset monitoring to fit whatever requirements you need to meet. Our alert system includes alert settings for speeding, ignition on/off, tow alerts, low battery, etc.

GEOFENCING SYSTEM

Set virtual boundaries around any location. Immediately receive alerts whenever the fence is crossed. Create up to 10 geofences per account.

DISPATCH MANAGER SYSTEM

Our Dispatch Manager system is specifically organized to streamline working operations of fleet and trucking businesses. This system allows you to map out all jobs and deliveries directly into our Matrack GPS tracking platform, organize jobs based on priority, assign jobs and deliveries to your different drivers, and automatically map out the optimal routes from job to job, in order to optimize your businesses fuel efficiency.

IFTA FUEL TAX REPORTS

IFTA fuel tax reports are required for intrastate commercial vehicles. These reports are calculated based on the number of miles driven through each state relative to the amount of fuel purchased per state. Based on our data records, we calculate and provide these reports to you so you don't have to.

ARRIVAL TRACKING SYSTEM

We give you a way to provide your clients with the means to track their deliveries in transit! Just let us know you want a tracking link for your customers and we will have you covered.

PREVENTATIVE MAINTENANCE ALERTS

Set your system to alert you anytime a vehicle maintenance is needed! (Eg. Tire rotations, Oil changes, Etc.)

BLINK ROADSIDE ASSISTANCE

Matrack Inc. has partnered up with BLINK Roadside Assistance to provide you with heavily discounted rates on the most responsive emergency services available. Ask for more details.

DIAGNOSTICS REPORTS

Our specialized OBD plug-in device plugs directly into the computer of your vehicle. This provides your device a very unique function to read and monitor your vehicle's diagnostics disposition. So at any time, if you are experiencing issues with your vehicle, this feature can be used to pull up a diagnostics report that can be provided at no additional cost and can be provided to your mechanic to expedite repairs.
